

Anubis

Advancing Organisational Business Process

See all your business. And use it.

- Provide a system that allows business processes to be adhered to, but remains flexible for future change.
- Record and allow systematic evolutionary organisational improvement.
- All staff actions and processes are traceable. This creates a **responsive audit function, preserving corporate knowledge and history.**
- Anubis delivers **web-based collaboration.**
- **Capture, store, present and archive** any records and artefacts pertaining to any business endeavour.

The screenshot shows the Anubis web application interface. On the left is a navigation menu with categories like Home, Members, News, Events, Document Root, and Board Meetings. The main content area displays 'Action Items Board 2010' with a table of open issues. The table has columns for #, title, area, type, severity, created, responsible, and state. The right sidebar shows a calendar for February 2011.

#	title	area	type	severity	created	responsible	state
20	Integrated Learning Program	Board Meeting	Set Corporate Direction	Medium	2010-12-15	boris	Open

1	Oracle Configuration Management	Board Meeting	Investigate/Check/Corrective Action	Medium	2010-08-16	boris	In progress

To buy separate software for process disciplines such as Quality Management, Project Management, Configuration Management, Production Management and Engineering Management would be immensely expensive. It would also prove to be difficult to implement, even more so if you wanted to integrate these together. **With Anubis, your organisation doesn't need to.**

Instead of investing in multiple products, **Anubis delivers core capability across many functional domains, making it an extremely cost-effective investment**, around 10% of the cost of software licencing for the same packages if purchased individually.

Anubis integrates this into one seamless package.

Anubis Core Features:

- Issue and risk tracking
- Version Control
- Questionnaires
- Content Management
- Linked Knowledge
- Knowledge snapshots
- Workflow
- CRM Integration

Anubis Enabling Features:

- Open Architecture, ISO9001:2008 Certified
- Linux/Windows/Unix deployment
- Suits most popular web browsers
- Privacy controlled by user Access Privileges
- System is fully secure

The screenshot shows the 'Technical Tree Status' overview in the Anubis application. It features a table with columns for Title, Description, Item Type, Modification Date, and State. Below the table, there are links to 'Subsystem Status' and 'CI Status View'.

Title	Description	Item Type	Modification Date	State
2nd wff test file	2nd file added to tree	File	May 07, 2010 09:37 AM	internal
Technical Tree Status	Provides an overview of the status of objects in the technical tree	Collection	May 07, 2010 10:11 AM	internal
Subsystem Status	Subsystem status overview	Collection	May 11, 2010 08:53 AM	internal
Test Subsystem Folder - WaffleTICKler Subsystem	A subsystem that tickles waffles	Subsystem Folder	May 10, 2010 02:57 PM	subsystem-design-phase
2nd Test Subsystem - PreenViewer Subsystem	A subsystem that views preens	Subsystem Folder	Jul 07, 2010 03:23 PM	concept
CI Status View	An overview of Configuration Items' status	Collection	May 07, 2010 10:23 AM	internal
